DTEK
DIVING EQUIPMENT

DESCRIPTION

- Dive wear suitable for cold climates, thermally equivalent to 600 gr.
- Overlapping applications on the kidney and stomach areas to increase thermal action.
- Made of a technical Pile "No Wind" in three layers with breathable and thermal reflective membrane "ZERO WIND".
- Zip with double slide and thermal protection.
- Lateral pockets and small pocket on chest position.
- Stretchable gaiters on the bottom of the legs to retain under-foot position.
- Arm with thumb finger ring to hold it in place.
- Double entry for Pee Valve connection.
- Complete with our heating plates on back, side and legs, through connection E/O cord with 12 V battery pack.
- External cable for battery packet connection hidden when not used.
- Suitable in standard version for cold climates and in heating version for extrem climates.

0° - 10° C
